## PROFESSIONAL SUMMARY

BI / Reporting Analyst with 3+ years' experience improving reporting, process control, and decision-making across large, operationally complex environments. Strong track record of turning changing business processes into trusted reporting outputs through Power BI, Excel, SQL, Power Query, VBA, and data governance controls. Experienced in gathering requirements, running stakeholder reviews, improving reporting adoption, and maintaining documentation, validation checks, and repeatable methods to support reliable decision-making through change. Currently contributing to a Microsoft Fabric migration programme, including source analysis, transformation logic, reconciliation, reporting outputs, and rollout support.

## CORE SKILLS

- **Project & Delivery Support**: process improvement, reporting governance, controlled change, backlog prioritisation, adoption support, roadmap tracking, documentation, runbooks
- **Reporting & Analysis**: Power BI, DAX, Power Query, Excel, Excel VBA, dashboard development, management reporting, decision-ready insight, KPI definition, drill-through analysis
- **Data & Automation**: SQL / T-SQL (CTEs, window functions, query optimisation), Microsoft Fabric (Lakehouse, Warehouse, Pipelines / Data Factory, Notebooks, semantic models), PySpark, SSIS, ETL / ELT, data integration, orchestration, Excel / VBA
- **Stakeholder Engagement**: requirements gathering, review meetings, stakeholder management, workshop facilitation, feedback capture, insight presentation, cross-functional collaboration
- **Data Modelling & Quality**: dimensional modelling, ERDs, data-flow mapping, validation controls, metric governance, auditability, handover documentation

## PROFESSIONAL EXPERIENCE

GXO Logistics — Bradford, UK
***Senior MI Analyst*** — *Jan 2026 – Present*

- Delivered key components of a wider Microsoft Fabric migration and reporting modernisation programme, including source analysis, source-to-target mapping, ERD design, ingestion pipelines, PySpark transformations, validation logic, and reporting outputs across Pre-Advice, Orders, and Inventory Transactions.
- Built and maintained Microsoft Fabric Data Factory / pipeline orchestration flows and notebooks using PySpark and SQL, applying repeatable transformation patterns to improve consistency, supportability, and reuse across reporting datasets.
- Implemented reconciliation and validation checks between legacy and new outputs to support a controlled cutover, improve confidence in migrated metrics, and reduce the risk of reporting drift.
- Supported the rollout of new reporting outputs by working with stakeholders to gather requirements, clarify definitions, challenge weak logic where needed, and contribute to validation and sign-off discussions.
- Built Power BI reporting for audiences ranging from operational managers to site leadership, enabling clearer visibility of performance, underperformance, escalation points, and improvement opportunities.
- Produced core ERDs, data-flow diagrams, lineage documentation, and runbook notes to improve auditability, handover, and ongoing support across the migrated reporting landscape.
- Improved performance and usability by aligning storage and transformation decisions to downstream reporting needs, supporting more responsive and reliable outputs.

NexAura — Remote
***Data Consultant (Project-based)*** — *Jul 2025 – Jan 2026*

- Co-delivered an AI QA and coaching MVP for a call centre, covering call ingestion, transcription, scoring logic, and dashboard-ready outputs for team and agent performance review.

- Translated business and QA requirements into scoring logic, KPI definitions, reporting views, and supporting validation structures, helping ensure outputs were consistent, usable, and auditable in practice.
- Produced client handover artefacts including SOPs, KPI dictionaries, and process maps, supporting adoption and reducing post-delivery support risk.
- Worked across delivery, process, and reporting needs rather than analysis alone, helping shape outputs that could be sustained beyond initial build.
- Contributed to a solution that materially reduced the unit cost of QA coverage versus manual sampling by shifting effort toward automated first-pass scoring with human review focused on exceptions.

GXO Logistics — Bradford, UK

***Data Analyst (MI)*** — *Aug 2022 – Aug 2024*

- Delivered end-to-end BI and reporting solutions to improve operational visibility, process control, and decision-making across warehouse operations, using Power BI, SQL, Power Query, Power Apps, Excel, and VBA.
- Led the digitisation of a floor-walk process by replacing ad hoc inventory checks with a Power Apps, SharePoint, Power Query, and Power BI solution, enabling structured issue capture, photo evidence, and standardised categories.
- Improved process consistency and removed double-handling, saving 4–8 staff hours per day across around 30 users and 3 shifts, while improving comparability of findings across teams and time periods.
- Enabled weekly senior reviews of recurring issues by area, category, and shift, supporting clearer accountability, more evidence-based escalation, and better follow-through on actions.
- Owned weekly finance and operational performance reporting for senior leadership, integrating multiple inputs from Finance, HR, Payroll, Planning, and Operations into a consolidated view of site performance.
- Investigated and resolved data issues and variances across source inputs, reconciling figures, validating assumptions, and incorporating operational context to keep reporting accurate and decision-useful.
- Produced high-level summaries for senior stakeholders, chaired weekly reporting discussions, and responded to challenge on performance movements, drivers, and reporting logic.
- Automated a suite of 10+ daily operational reports in Excel VBA, covering ingestion, cleaning, calculations, pivot/chart refresh, and email distribution; saved 6 hours per day and reduced manual error risk through standardised logic and validation checks.

## EDUCATION

**Leeds Trinity University** — Leeds, UK

*PGCE Secondary Mathematics* — *Sep 2024 – Jul 2025*

**University of Leeds** — Leeds, UK

*BEng Chemical and Process Engineering* — *Sep 2019 – Jun 2022*

## CERTIFICATIONS

- Google Data Analytics Professional Certificate (Coursera, 2022)
