PROFESSIONAL SUMMARY

Business Intelligence / Data Analyst with 3 years of experience delivering operational reporting, dashboards, and data pipelines across logistics and consulting environments. Data engineering-leaning profile: Microsoft Fabric, Spark/PySpark, SQL, and delivery practices such as CI/CD, documentation, and data quality controls. Strong stakeholder-facing capability: requirements capture, KPI definition, and clear communication to non-technical audiences.

CORE SKILLS

- **BI & Analytics**: Power BI: semantic modelling, DAX, Power Query (M), RLS; DAX Studio: measure optimisation and performance investigation; Dashboard design for operational and executive audiences; KPI definition and storytelling; Tableau: connections, calculated fields, filters/parameters
- **Data Platforms & Engineering**: Microsoft Fabric (Lakehouse/Warehouse, notebooks/pipelines) - working knowledge (studying DP-700); PySpark (data transformation, ingestion patterns); SQL (SSMS 21): CTEs, window functions, stored procedures, query optimisation; ETL/ELT & orchestration: Fabric pipelines, SSIS/ADF exposure, Power Automate triggers/alerts; Data quality: validation checks, reconciliations, monitoring, and audit trails
- **Delivery & Collaboration**: Requirements gathering, stakeholder management, workshop facilitation; Project delivery support: Miro for process mapping, ERDs, and delivery artefacts; Version control and CI/CD basics (PR workflow, deployment hygiene) for analytics assets; Documentation: data dictionaries, runbooks, KPI definitions, and handover notes; AI-assisted development: using Copilot in Visual Studio for acceleration (reviewed/validated)

PROFESSIONAL EXPERIENCE

GXO Logistics — Bradford, UK
Senior MI Analyst — *Feb 2026 – Present*

- Support in migration and modernisation of reporting datasets into Microsoft Fabric, moving legacy logic toward scalable Lakehouse patterns and improving reliability of refresh and definitions.
- Development and maintenance of ingestion and transformation pipelines using PySpark (notebooks) and SQL.
- Creation and maintenance of ERDs and data flow diagrams to document entities, keys, and metric logic; use of Miro to collaborate with stakeholders and align on definitions.
- Optimisation of Power BI semantic models and DAX measures (using DAX Studio) to improve report responsiveness and refresh performance.
- Contribution to delivery practices including documentation, basic CI/CD workflows (version control, PRs), and operational runbooks to improve reliability and reduce single points of failure.
- Leverage of Copilot in Visual Studio to speed up development tasks (boilerplate, refactors, documentation drafts) while validating logic and edge cases.

NexAura — Remote
BI, Data & AI Consultant (Project-based) — *Jul 2025 – Jan 2026*

- Co-lead in delivery of an AI QA and coaching tool for call centres: ingest calls, run transcription, use LLM to evaluate against a QA rubric (opening, tone, etc.), and surface agent/team performance in dashboards.
- Translation of client QA and operational requirements into scoring logic, KPI definitions, and reporting views; alignment of stakeholders on what “good” looks like and how it is measured.
- Support in the data and workflow layer (ingestion patterns, data modelling/ERDs, validation checks) to ensure outputs are consistent and audit-friendly.

- Production of client-facing documentation and delivery artefacts (process maps, SOPs, KPI dictionaries) to enable adoption and reduce handover risk.
- Conclusion of engagement after MVP delivery, documentation, and handover (Jan 2026).

GXO Logistics — Bradford, UK
Data Analyst (MI) — *Aug 2022 – Aug 2024*

- Design and delivery of Power BI dashboards for operational performance, labour productivity, and throughput in large-scale warehouse operations.
- Maintenance of SQL datasets and dimensional models (fact/dimension tables).
- Cleaning and standardisation of multisource data (APIs, csv/txt files, relational databases, cloud platforms, ect.).
- Automating refresh and ingestion using SSIS, reducing manual reporting effort and improving timeliness.
- Partnering with operations managers and senior stakeholders to define KPIs, explain insights, and support decision-making.

PROJECTS & CONTINUOUS LEARNING

- **Sales Analytics Dashboard** (Power BI): star-schema model (500k+ records), executive KPIs, drill-through, and trend analysis.
- **House Price Prediction** (Python): regression models (linear, random forest, gradient boosting) to estimate property values.
- **AI Workflow Automation** (n8n + OpenAI): automated classification/summarisation/routing workflows to demonstrate practical automation patterns.
- **Smart Device Analytics** (SQL, BigQuery): usage trend analysis and recommendations.

CERTIFICATIONS & TRAINING

- **Coursera:** Google Data Analytics Professional Certificate (2022)
- **Lean Six Sigma:** Process improvement fundamentals (2023)
- **Udemy:** Python for Machine Learning and Data Science
- **DP-700:** Microsoft certified: Fabric Data Engineer Associate (in progress)

EDUCATION

Leeds Trinity University — Leeds, UK
PGCE Secondary Mathematics — *Sep 2024 – Jul 2025*

University of Leeds — Leeds, UK
BEng Chemical and Process Engineering — *Sep 2019 – Jun 2022*

Dixons McMillan Academy — Bradford, UK
*A Levels: Mathematics – **A***, Chemistry – **A**, Physics - **B*** — *Sep 2017 – Jul 2019*
